

HOW CAN UNIQUE HELP YOU?

As you navigate the world of rare chromosome and gene disorders, we want you to know that you are not alone

Unique is an open, supportive community for people who are looking for information, to share experiences and to connect with others

We have many different support services:

HELPLINE

Our team of sympathetic and knowledgeable staff offer phone, messaging and email support to families and professionals worldwide. Contact them with your specific questions or to talk through your worries

INFORMATION HUB

We produce highly respected information guides for individual rare genetic conditions, practical information guides, Easy Reads for adults with learning difficulties, children's picture booklets and multilingual translations

MATCHING SERVICE

We connect families with similar genetic conditions, similar medical/developmental issues or geographic locations. We facilitate connections between members and relevant research projects while also providing support to healthcare professionals

WEBSITE

All the information we publish, such as the genetic and practical guides, our 'Join Us' page, news updates, research collaborations, and Unique shop, are all free to access on our website

ADVOCACY

We campaign and advocate for those with chromosome and gene disorders by contributing to research studies, participating in scientific, medical and policy conferences and advisory boards, and collaborating with other organisations in our field

MAGAZINES & NEWSLETTERS

We regularly publish a magazine and e-newsletters featuring member stories, celebrating their joys and challenges, along with updates on exciting research projects and practical articles that address everyday life

COMMUNITY BUILDING

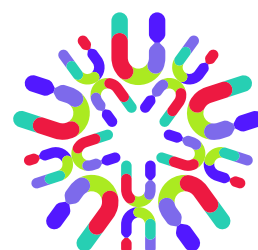

We bring people together through family and information events, webinars and our members-only Facebook group

WE ARE UNIQUE... & SO ARE YOU

THIS IS A JOURNEY WE CAN MAKE TOGETHER
