

Understanding Chromosome & Gene Disorders

Self-isolation

rarechromo.org

SELF-ISOLATION

We are living in unprecedented times. Many parents and children will be feeling worried and scared about Coronavirus. Children with rare chromosome or gene disorders might have little understanding of what is going on; why their routine has been disrupted and why they are not going to their childminder, nursery, school, daycare, respite, etc. We have put together this guide to help provide resources and positivity to our parents and their children, whilst we are all self-isolating at home. We are not going to focus too much on Covid-19 throughout the guide, links to that information can be found quite easily. However, because there is lots of fake information doing the rounds, we have including links to official Covid-19 guidance, because they are necessary. General advice regarding Coronavirus (#COVID19) for patients with rare genetic disorders is now available on the Unique website at

<https://www.rarechromo.org/covid19update> This Includes patients with developmental disorders and undiagnosed developmental delay, rare single-gene disorders and chromosomal disorders. This document will be updated as further information becomes available. With thanks to British Society of Genetic Medicine, Clinical Genetics Society and The Royal College of Physicians. Since the first edition of this guide was produced there has been some good news. Vaccines have been produced by Pfizer-BioNTech and Oxford/AstraZeneca and Moderna to help protect us <https://www.nhs.uk/conditions/coronavirus-covid-19/coronavirus-vaccination/coronavirus-vaccine/> We all have to wait patiently to be called for our vaccination, but at least we have been given some hope that we will get back to some degree of 'normality' in the not too distant future.

The JCVI (Joint Committee on Vaccination and Immunisation) has included unpaid carers on the vaccination priority list (UK wide) group 6. Although some carers will be in a group higher up the list due to age if they are over 65. If you haven't already done so, it would be helpful to let your GP surgery know that you are a carer and have it marked on your personal record and that of your cared for child/adult. This will also help them identify you as a carer for free flu jabs and other carer related resources.

An American PBS project aimed at talking to children about the coronavirus.

HELPING YOUR CHILD AND YOURSELF TO COPE DURING THE PANDEMIC

During lockdown when we cannot see the people we love, like our friends and family, it is important to draw on resources available locally as well. If you cannot or do not want to visit a supermarket for your groceries, try to get an online delivery slot, or shop local in smaller shops. If this isn't possible, there will be available resources for people that cannot or don't want to go out. Local Covid support hubs have been set up by local councils and also there are many Coronavirus support groups available locally on Facebook, Twitter, etc, so if you need help, look for your nearest one and don't be afraid to ask.

Ways to keep busy during these unusual times

<https://www.mencap.org.uk/advice-and-support/coronavirus-covid-19/coronavirus-ways-keep-busy>

COPING IN AN EMERGENCY

It is important to keep a list of contacts, in case of an emergency. It is advisable to have one inside your front door and may be a separate copy to give to all of the people on the list. The one in your house would be best laminated. If your child is known to Social Services disability teams, ask them if they have a Covid care plan.

- ◆ **Carers UK** <https://www.carersuk.org/help-and-advice/health/looking-after-your-health/coronavirus-covid-19>

Carers Uk have published guidance for carers during this time and will be regularly updating the page as new information becomes available. It includes advice on emergency planning and advice for working carers.

- ◆ **Together Matters—How to plan for an emergency** <https://www.togethertomatters.org.uk/resources-and-information/>
Has lots of information and resources on emergency planning on its website.

A hospital passport can be used if your child has to go into hospital, although these are mainly used for adults with communication difficulties. It is important to realise that should your adult child be admitted to hospital, you might not be allowed to stay with them, so it is important to have this type of document at the ready, to go with them. If your adult child does have to go into hospital, it is advisable to contact the hospital learning disability liaison nurse, they can help by liaising with staff to get the best care and support as an in-patient. Details can be found on your local hospital trust website.

Talk to your friends and family by phone (I'm sure you are already doing that) but also if you have it installed on your phone/tablet, set up a what's app group, so that you can chat at any time via text or face to face. You can also download apps like Zoom where you can hold meetings, and can see and hear each other. You can sign up and talk for 40 minutes for free.

Education at home

You will by now have become used to your children being at home full time. Many of you will have been sent work or links to access work online by your children's school, it is best to continue with their work, so that they will all be working from the 'same page' when they return to school. Keep to a routine if you can, it might be best to start at the same time school would normally start, with a morning break, lunch and an afternoon break, or maybe a short working afternoon and then play. Because home and school are usually separate, it might be a bit of a struggle for some, so try the little and often approach if a full daily routine doesn't work for you. If you have the ability to turn a room of your house into a classroom that would also help, your dining room might be ideal. If you like a structured day for your children, a timetable might help to plan over different days. You could develop your own timetable, there are so many different sources of educational support online, it is well worth searching for lessons that would interest your child. Below are some ideas for compiling your own daily timetable.

<https://www.autism.org.uk/about/strategies/social-stories-comic-strips.aspx>

◆ **The Isabella Trust**

[https://www.theisabellatrust.org/visuals-and-communication-support/Visuals and choice boards](https://www.theisabellatrust.org/visuals-and-communication-support/Visuals%20and%20choice%20boards)

For children with a rare chromosome or gene disorder, home schooling might be very difficult. Children may not understand because school is a separate place that they normally go to and often therapies and other things are done at school, not necessarily in the home. Personally I wouldn't worry too much about structured learning. Little and often might suit your child and family better, they can often learn so much more just from everyday life, if you can keep them occupied and find things that they like to do and incorporate into family living. Try not to stress too much.

There are so many 'resources' out there (we can be bombarded with them) that this might all feel overwhelming with lots of parents trying to do it all and be the perfect parent substituting for teacher, carer, grandparent and colleague all at once. We need to pace ourselves. This could still go on for some time yet – and as parents we need to be here for the long haul. Make sure you also have time for yourselves, avoiding burnout, doing what you can, not striving to achieve perfection or what somebody else manages to do or say. Social media shows best examples but they are not typical and certainly don't apply to every family. We'll all need to dig deep. As parents of Unique children we know this – we've been doing it for years – with varying degrees of support. Support especially at a time like this comes from all sorts of unexpected places. Routine, fresh air, reasonable nutrition, taking it one day at a time and doing what you can in your own circumstances is the best most of us can achieve.

IDEAS FOR KEEPING THE KIDS ENTERTAINED.

Crafting, sewing, painting, drawing, messy play, jigsaw puzzles, cooking, board games, garden games. Leapfrog, crab walks, stretches, jumping, rolling, gardening, walking etc.

◆ **Amazon Audible** <https://stories.audible.com/start-listen>
Amazon have cancelled the subscription of books and audio stories for children and students of all ages as long as schools are closed, kids everywhere can instantly stream an incredible collection of stories, including titles across six different languages, that will help them continue dreaming, learning, and just being kids. All stories are free to stream on your desktop, laptop, phone or tablet.

◆ **CBeebies** <https://www.bbc.co.uk/cbeebies/games/>
Fabulous interactive games and puzzles

◆ **Google 3D animals**
<https://9to5google.com/2021/01/07/google-3d-animals-list/>
You'll need to google an animal, for example: 'giant panda'. Just underneath the image search results, there will be a description of the panda, you'll be able to see a little box that says, "Meet a life-sized giant panda up close".

◆ **Chester Zoo** <https://www.facebook.com/chesterzoo1/>
Live animal videos via its Facebook page

◆ **Edinburgh Zoo**
Animal webcams <https://www.edinburghzoo.org.uk/webcams/panda-cam/>

◆ **Football**
Learn about Football <https://www.youtube.com/footballschoolfacts>

◆ **Minecraft** <https://www.minecraft.net/en-us/>
Minecraft is making its educational worlds available free, to help pupils no longer able to attend school because of the self-isolation period.

◆ **Balloon Volleyball**
Blow up a balloon and use a piece of masking tape to mark a centre line on the ground. Variation for older children/adults: If you have more than one person playing, you can add more balloons to make the game more challenging.

◆ **Twister**
This game is a great way to keep kids moving, help them work on gross motor skills, and give them practice telling left from right. If you don't have the game, you can use coloured paper or magazine pictures to create your own twister mat.

“ *We race each other like animals. So for example: crab walking - we will race each other. I do wall push ups next to my son. It's fun, gives them movement and input, and has nothing to do with a computer or screen, as most of our kids are having to do computer based learning.*”

You could get your children to help with the chores, but make it fun, with a reward for doing so. This could just be as simple as sticking stars on a sticker chart.

◆ **The Imagine Tree** <https://theimaginationtree.com/>

Lots of ideas for kids sensory play including homemade natural fruit or gluten free playdough, etc.

◆ **Spread the Happiness - 101 things for kids to do**

<https://www.spreadthehappiness.co.uk/>

◆ **Rainbow pictures**

What is the meaning behind the pictures of rainbows?

Children up and down the country have been drawing/painting rainbows to put in their windows. They are to cheer people up, rainbows are used as a symbol of peace and hope. Parents out with their children often go out spotting pictures of rainbows in other children's houses, whilst out on their daily walk, there is a Twitter hashtag #ChaseTheRainbow

◆ **Over the rainbow** <https://tinyurl.com/uzzxzph>

sung by our very own Unique Rosie, who is happy to share her cover version of this beautiful song with you all

◆ **Singing hands**

<https://singinghands.co.uk/>

Online classes and videos using Makaton.

“ Send regular emails and little film clips to adult children living in shared lives or independent living (if they are able to access them) . ”

THERAPIES AT HOME

As with all therapies, if you are practising at home, it is best to seek the advice of your regular physiotherapist, to see if they have any exercises that you can do with your child safely whilst self-isolating.

◆ **Bumble Bee physio**

<https://www.facebook.com/bumblebeephysio/>
Live Physiotherapy videos.

◆ **Fox Wood School's Sensory Activity Challenge**

<https://tinyurl.com/vqcyj8j>

Every day a different sensory activity is posted, that you can try at home. *Please note: this activity will not be suitable for all children/families/homes - parents and carers are asked to watch the clips first and then only use the ideas and/or share the clip with their children if they think it is safe to do so. They advise that all children are supervised whilst carrying out the activities to ensure their safety. All activities are carried out at your own risk.*

EXERCISE FOR EVERYONE

◆ **CBeebies Andy's wild workouts**

<https://www.bbc.co.uk/programmes/p06tmmvz>

Approximately 7 minutes of exercise in each workout.

◆ **Joe Wicks PE** <https://tinyurl.com/vjhxmqb>

Dance

Music is good for the soul and can help your child burn off some extra energy. Put together a playlist of music your whole family can enjoy and just dance!

◆ **Electric Umbrella**

<https://www.electricumbrella.co.uk/>

◆ **Go Noodle** <https://www.gonoodle.com/>

Movement and mindfulness

◆ **NHS stretch and Flex podcasts**

<https://www.nhs.uk/live-well/exercise/strength-and-flex-exercise-plan/>

◆ **Walking**

If you live near woods, your once a day walk could be a nature walk, get your kids listening to the birds and try to identify them, or leaves on the trees, etc. If you are walking just around the houses, make it more interesting by playing at spot a particular colour front door, or car. Children can get very bored very quickly, so it helps to make activities more interesting and fun. You could play i-spy. Remember you aren't supposed to be out for longer than one hour and you mustn't meet up with anyone.

◆ **Yoga**

Cosmic kids yoga <https://www.youtube.com/user/>

Fun Yoga for children.

PARENTS

Find the courage and strength to have a little 'me' time. You may say that you don't have time to think about yourself. Find time to read quietly if you can or practice the art of mindfulness, you can do it wherever you are. If you can't find a quiet spot, just try to tune into your own mind and block out other noises around you. We all have to go to the bathroom, so often that is a good time to try and relax without any distractions. Look after yourselves.....

[Mindfulness links.....](#)

◆ **NHS**

<https://www.nhs.uk/conditions/stress-anxiety-depression/mindfulness/>

◆ **Be Mindful** <https://bemindful.co.uk/>

This is brilliant at making sure you have focused mindfulness and stress-relief within your day.

◆ **10 tips to help if you are worried about coronavirus**

<https://www.nhs.uk/oneyou/every-mind-matters/coronavirus-covid-19-anxiety-tips/>

◆ **Your Self Help Survival Guide** <http://bit.ly/corona-anxiety>

Created by Dr Jenn Cooper, a Chartered Counselling Psychologist. Find practical strategies to help to manage any anxiety or distress that Covid-19 is causing.

◆ **Libraries are closed but you can still borrow books**

Although all libraries are now temporarily closed, that doesn't mean that you can't enjoy a good book! The Devon Libraries Digital Library <https://www.devonlibraries.org.uk/web/arena/home> lets you stream loads of free eBooks, eAudioBooks, eMagazines and much more. Your local library may well have an online catalogue and ordering service allowing you to click and collect too.

◆ Colouring books for adults

There are some fantastic colouring books on the market. They are similar to children's colouring books but the patterns and pictures are more grown up, the pictures often look amazing when they are coloured in and it can be very relaxing and therapeutic. They are great if you have always liked art but never felt confident with drawing; the drawing has already been done, you just colour in. Available from many online sellers.

◆ Theatres are closed, but many have chosen to livestream

Live streamed theatre and opera <https://tinyurl.com/r4qfymv>

◆ Working families

<https://workingfamilies.org.uk/article-categories/covid19/>

Helping working parents and carers and their employers, find a better balance between responsibilities at home and in the workplace. They provide free legal advice to parents and carers on their rights at work.

◆ Special Needs Jungle <https://tinyurl.com/r6hqu5f>

Using direct payments during the virus outbreak.

FOOD

If you are struggling to get out to find fresh produce, many of the wholesalers that previously sold to market traders, shops, pubs and restaurants have a lot of stock that needs to be sold, so they are now selling/delivering to the general public. **The new Covent Garden market** is 75% down in sales. Sign up for home delivery of veg and fruit boxes. They can deliver milk, bread etc. too.

<https://www.newcoventgardenmarket.com/fruit-veg>

Many of these suppliers are in the London/Surrey postcode area, but if you do some research, you will find other suppliers local to you that will be offering a similar service.

Remember you are not alone and we are all in this together. Do use our Unique network café group on Facebook to chat with other parents. Stay safe and remember to stay 2 metres apart from anyone if going outside.

⇒ Keep washing your hands.

⇒ Wear your face mask.

⇒ Stay safe.

We will get through this.

For many of our older children, wearing a mask is difficult. You can obtain sunflower lanyards and ID cards from **Hidden Disabilities:**

<https://hiddendisabilitiesstore.com/shop/sunflower-lanyards.html>

“ My son won't tolerate wearing a mask but he does tolerate a snood, so I bought some of those for him. ”

Unique family diary.....

One of our parents kindly shared this text from her family diary, I think this will be helpful to a lot of families.

“ We have a blackboard in the kitchen that has our usual weekly schedule on it. We've amended it and made it a bit more fun and also used the liquid chalk markers on the patio doors to let the kids get creative. We've been making little video diaries and putting them in a private album on FB just for a select audience so they can't be freely shared. Even their grandparents have sent a video message back. So yesterday I was interviewed by my 9 yr old and today she interviewed her sister about her favourite things. I love that we are creating a little bit of history and sharing some happiness with the world. We have been using YouTube a lot, live streaming of songs and stories by artists. I ordered a projector off amazon to link up with my iPad, so that I can use it to share with everyone. We've done pantomimes with dens under the table, we've done interactive PE sessions, we've accessed live web feeds of aquariums, because water is really soothing and fish are relaxing to look at. We've been spending time in the garden. Playing with balls and making up games. Most importantly we haven't been schooling. We have let the kids do the learning they want. M. at times has wanted to do some schoolwork, but we are doing fun word-searches and creative things mostly. She is missing her classmates and teachers and it's important to acknowledge that. We have taken the time to be together as a family and to support the girls through such a difficult transition. We have explained the situation and reminded them that everyone is doing the same thing. Using online live links, they are still feeling connected with the world. We have prioritised fun and space, had lots of little activities that are easy to do and that we can dip in and out of. We've spent a long time with the TV on, watching iPlayer and Netflix and the most important thing in all this, is that I am not allowing myself to feel guilty about any of it. We are a unique family and we must do things differently. We don't compare ourselves to other families at other times, so we aren't comparing ourselves now. It doesn't matter if little Jonny has done 4 hours of schoolwork and that Jane's mum and dad can work full time from home because they've got home-schooling nailed. The truth is that I've been home-schooling our little monkey for 11 weeks now because of issues at her school not related to Coronavirus and what we are experiencing now is not Home Education or Home Schooling. We are all in a period of confinement and when you normally home educate can't do that. It's just not possible. For families who have two parents working from home, you have to recognise that something has to give. It is best to see if you can both work part time and see if you can schedule your day so that you can both get work done separately. Alternatively, you can do what we do sometimes and stick on their favourite film and both get an hours work done before it descends into chaos. No-one is expecting you to be

wonder-woman or superman, it's just not possible. Accept that you will have to work reduced hours and make up a timetable for each day. Start with times that you have meetings and calls that cannot be avoided, things that must be done on sensitive or urgent timescales. Then prioritise what else you need to get done and what can wait.

Use the three baskets or boxes traffic light method.

The smallest one is red, that's the one urgent thing that you need to do that can't wait, no matter what. Then the middle sized one is amber/orange, that's the stuff that you want to get done, but isn't as urgent as the ONE RED THING (okay if it's a conference call or something urgent then you can add two or three, but prioritise them) then once you have half a dozen things in the amber one, everything else goes into the green. If it's not urgent it can wait. Make sure that you put one thing with your child in the amber box, you need to prioritise a bit of time or an activity with them and I don't mean lunch or dinner. Something fun that you will both enjoy. It's important to your mental health that you do this, feeling guilty about not spending time with your kids is a real thing and it eats away at you. It also means that at the end of all this when you look back you will have some happy and fun memories to draw on. Make sure if there are two of you, that you schedule a bit of time for each other and that you keep the lines of communication open, if something is bugging you, or you need a bit of help, then have a phrase where you know instantly that the other person isn't okay and just needs to step out for 5 minutes. In our house I will say to my hubby "I just need to step away" and he knows instantly that I need him to take over the kids and give me a few minutes to process my feelings, work through my thoughts and ground myself. I leave the room and do some deep breathing and empty my mind, then slowly let back in what's happened and how I am going to move forward.

Likewise, he will say to me "I need you now" and I know he needs the same. We don't use these phrases at any other time, which is why it works. We have a home office because of my degree (and sofa bed for family to come and provide respite overnight for us; as well as to spend time as a family) as we don't have visitors and L has to work from home, we have set up a three-person office, where we all have our own space and this includes a little workstation for our mainstream daughter to give her a space to do work if she wants. She likes feeling like a grown up. This also gives her space from her sister, they are not used to being around each other all the time. We have a baby gate in the hall to allow T safe space in her room to play and be away from M. It has become apparent over the last two weeks that what people are struggling with, is time to themselves and space to be apart. It is hard having everyone at home and for us creating spaces for them to be together and apart has been ideal. We are forever evolving in this situation and trying to make the most of it. We are sorting out our adult bikes this weekend as mine has a puncture, so that we can go cycling as it's a great way to get some fresh air and practice social distancing safely.

We are making window decorations and painting lots of things. We've

printed out colouring pages to paint so that the girls can have more inspiration and variety. There is a lovely artist called Flossie Hunt who is creating a special range of sketches to colour, the series is called Crayonavirus and they are beautiful. If you email her she will add you the mailing list and send you out each set of illustrations as they're ready. Her Facebook page is Flossie Hunt Illustrations and her website is:

<https://www.flossiehuntillustration.com/crayonavirus>

Often T doesn't want to colour as she finds it difficult, but she will sit and pick the colours for me and tell me which bits to colour. It's a great way to share an activity. We have had them in the kitchen taking it in turns to help with cooking and baking. It doesn't matter how the food turns out, it's the time together and the

experience that is important. If my kids come out of this with extra skills, then that's a bonus. We have had to accept that we can't do things like other families do. That our needs are very different and that we need to be realistic in our expectations. So L and I sat down whilst the kids were asleep a few days ago and talked about what we hoped to achieve from this self-isolation period and what we will do going forwards, as the reality is, that we are likely to be in this situation for some time. We agreed that an academic education isn't a priority at all. That our aim for M is to simply retain all the knowledge she has learnt so far, and that the greatest thing we can educate her in, is life skills:

- ◆ conflict resolution - we all need to be able to have this skill
- ◆ caring for animals and other people - we have two cats and she has a tropical fish tank
- ◆ confidence and projection - through video diary and FaceTime with family and friends
- ◆ tolerance for others - again, something we all want to work on
- ◆ understanding the situation - to teach them that this isn't normal, but it is part of history.
- ◆ reinforcing the importance of good hygiene and why we are spending time inside (I know a lot of families have children who can't understand this, but that's where visuals come in)
- ◆ flexibility and taking turns - we have got games from peaceable Kingdom which are cooperative games, it's about achieving an objective instead of having one-person win. We especially love Bedtime Bunny, one which is aimed at age 2+ and can be played by the kids on their own.

To help M feel better, we have also made some fabric face masks as they love playing doctors. We have a proper doctors set up with a stethoscope, sats finger monitor so that when the girls are in hospital they're familiar with the equipment and don't get anxious. When we have been out

before, they've noticed people wearing face masks and seen them on TV. So we got out the sewing machine and made some. They like pretending to be doctors and now if we have to go out, or someone had to come round, it's easy, because they're safe and it's reassuring for them in a positive way. It generates so much interest on their video diary, that we've been asked to make some for a friend who is a community midwife. We've sent some to elderly family members and M really feels like she's helping and making a difference. It all bolsters her mental health, as she is so fragile and we worried how she would cope with such a drastic change in circumstances. We have worked on a lot of sensory integration across the house. We have sheets and blankets (and pegs) for den building and we are also using pegs and ribbon to display our artwork around the house and have somewhere for all the pictures to dry. It's also visually stimulating. We've made dough using hair conditioner and cornflour, we've made bubble baths and water play, a fun activity. We've got chalk sticks out for the garden, lots of balls and bubbles too. We've got a light projector in T's room with dark curtains that allows us to have a quite space to relax. I have a kids meditation audio-book with relaxing music through audible (see page 11). Great if your child has visual problems and it is also quite relaxing. We've got an old clothes rail and put all the dressing up stuff on it, so it's easier to see what they have and for them to play with. We are spending more time playing with the children. We tried the Lego challenge, but that didn't work for us, instead we made a Lego city mixing normal Lego with Duplo. Most importantly we recognise that this is hard for everyone. The kids are struggling, but the more we get anxious about it the more they seem to pick up on it. So, we have taken a step back. L's work are aware of our situation and are grateful for him being able to do work from home. But he steps away when I need him to help and we have found a way to make it work. Communication for us has been key. If the kids don't understand, we find a way of showing them, we mirror the behaviour we want them to have and we concentrate on keeping calm and reminding everyone to have realistic goals and expectations of each other. I remind the children that I am only one person and that sometimes they may have to wait, or I may have to say no and reassure them that we are doing the best we can. I remind them that the prime minister has told us we have to stay at home and that it's not our fault and that we don't want them to get sick and poorly. We have family speaking to them telling them stories of what they have been up to and reassuring them that they are okay and stuck inside too, it helps the kids to know it's not a punishment and that we are following instructions and that we as adults have to do as we are told sometimes too. Mostly, we do what we can, we do what works for us and we forgive ourselves when it all goes wrong. We can't change what has been, we can't change the situation we find ourselves in, but we can change what we do about it and for us, that's doing things our way. ”
